

FLYSURFER

HYBRID² MAKES YOUR LIFE BETTER!

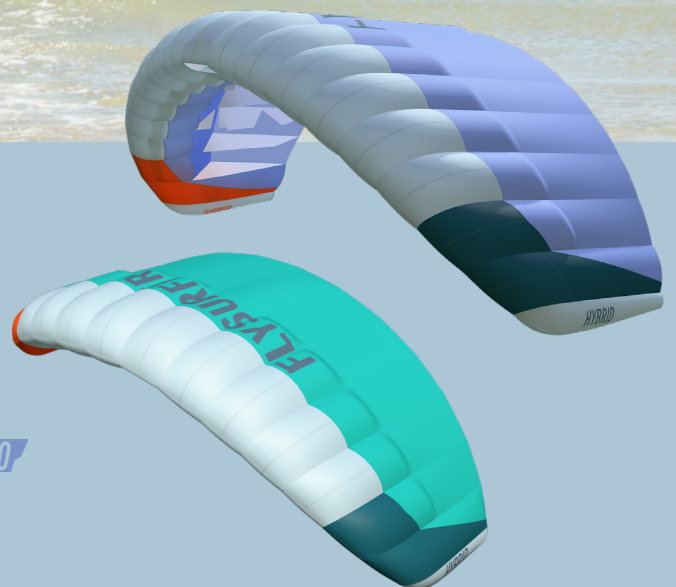

SIZES: 3.0 / 6.0 / 10.0 / 4.5 / 8.0 / 12.0

TECHNOLOGY: HYBRID FOIL KITE

FOCUS: PROGRESSION, TRAVEL

SKILLS: BEGINNER-EXPERT

TAGS: #flyhybrid #makesyourlifebetter #flysurfer

FLYSURFER

HYBRID²

The HYBRID² is more than just a kite—it's a commercial breakthrough for the industry. Designed to make kitesports more accessible, it addresses key challenges faced by beginners and advanced riders alike. Its unique hybrid construction (50% closed-cell, 50% single-skin) delivers an unmatched combination of stability, performance, and ease of use.

HIGHLIGHTS:

EASE OF USE

INCREDIBLE BALANCE AND DRIFT

DURABLE AND COST-EFFECTIVE

DESIGN CONCEPT

Kiteboarding has long been limited by gear complexity, learning barriers, and location constraints. The HYBRID² changes that. Its unique design allows beginners to practice safely, solving key learning challenges with minimal hassle. It reduces its projected area while sitting on the water, preventing unwanted downwind drag and keeping the rider in control to focus on the relaunch.

A lightweight design improves the kite's natural behavior when not actively steered, a key characteristic for stability. Our innovative T-frame construction allows the kite to sit stably at the wind window edge instead of constantly pulling down. The so-called minimal fly-down supports the drift behavior, which is especially noticeable when foiling waves or handling the HYBRID in light wind.

Durability is a major factor during lessons. When depowered, the single-skin sections reduce lift and limit acceleration, preventing harsh impacts. It even smooths out power spikes immediately when the beginner lets go of the control bar, decreasing pull or being accidentally lifted. The Cross-Safety System ensures an optimal flag out after release with a medium to low-aspect kite.

TECH FEATURES

Hybrid Design: 50% closed-cell, 50% single-skin for stability, low weight, and efficient depower.

T-Frame Construction: Closed center cell. Increases durability, reduces flapping, improves drainage, and features an integrated deflation valve.

Rigid Foil Supported LE: 12 and 10 m are tuned for upwind performance. Reverse & One-Line Relaunch: Easy relaunch in all conditions, reducing downtime and frustration.

Reverse & One-Line Relaunch: Effortless relaunch in any condition, especially improved in light winds with only one steering line.

Wind Window Edge Parking: Stays stable at 3 and 9 o'clock, minimal fly-down for better control and effortless handling.

Cross Line Safety: Front-line safety system for quick depower and easy reset after activation.

Performance Tuner: Adjust bar pressure and response to match your riding style and conditions.

Ideal for Schools & Rentals: The forgiving power delivery and stability reduce learning curves and increase student retention.

Increased Performance: T-Frame technology enhances durability, while the CCB Cut improves lift and reduces drag.

Intuitive Left/Right Differentiation: Three color-coded product lines (STAGE², CONNECT³, HYBRID²) make it easy for customers to find the right fit, streamlining sales and inventory management.

Broad Target Audience: With sizes covering twin-tip freeride, foiling, and wave riding, HYBRID² reaches diverse customer segments.

SCOPE OF DELIVERY:

1x HYBRID²

1x HYBRID Bag

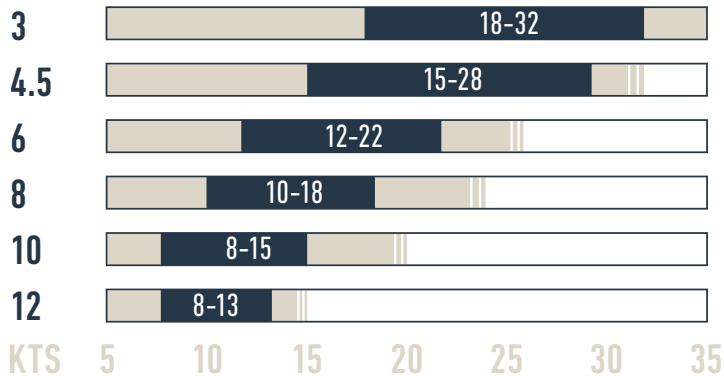

1x Repair Kit

1x Kite Safety Guide

1x Sand Bag

USP:
ALL-IN-ONE KITE FOR INSTRUCTORS

WINDRANGE

HYBRID² – THE IDEAL KITE FOR FAMILIES & RENTALS

A family holiday should be fun, not a struggle with heavy gear. The HYBRID² is ultra-compact and lightweight, making it easy to pack and travel. Young riders progress safely and independently on the water, while parents can switch to hydrofoiling and enjoy their session. Its durable construction and easy handling make it a top choice for rentals, ensuring hassle-free use for beginners and experienced riders alike.

Perfect for All Ages: Safe, forgiving, and fun for kids, parents, and beginners.

Ultra-Compact & Travel-Friendly: Packs down small, ideal for sports holidays.

Durable & Cost-Effective: Crash-resistant design extends rental lifespan.

HYBRID² – THE ULTIMATE KITE FOR SCHOOLS

For kite schools, the HYBRID² is the perfect all-in-one teaching tool. It covers everything an instructor needs—easy handling, smooth power delivery, quick relaunch, and durability. With a wide wind range and optimal sweet spots, you can run lessons in almost any condition, maximizing student progression and water time.

Effortless Teaching: Stable, predictable, and forgiving, making learning stress-free for students.

Quick Relaunch & Safety: Cross Line Safety ensures instant depower and easy relaunch after activation.

Durable & Cost-Effective: Built to withstand repeated use while maintaining high resale value.

Boat Teaching Made Easier: Integrated valve in the air intake streamlines deflation for quick kite pack-downs.

Intuitive Left/Right Differentiation: A uniform design from STAGE² to CONNECT³ to HYBRID² ensures clear visual cues, reducing handling mistakes.

With more teaching time, better student progression, and improved handling, the HYBRID² is the ultimate instructor's tool!
